SNORKELLING AND DIVING AT FREGATE ISLAND PRIVATE

The marine environment around Fregate Island Private is truly diverse and unspoiled, teeming with colour and dramatic topography. You can simply slip into the sea from four of our beaches and swim a few minutes out to a reef, soon you will be enveloped in a sunlit cloud of yellow unicorn fish or a manta ray may glide past.

We take great care of our surrounding seas, working alongside nature's own environmental team. Underwater you could come across a grazing turtle playing its vital role in the ecosystem, removing overgrown sponges which can smother healthy corals. Or you might hear the rhythmic munch of parrot fish eating algae off coral, keeping it clean and healthy.

Come beneath the waves to see how Fregate Island is protecting its coral reef. After consecutive coral bleaching events our coral is starting to recover in spectacular style. To give it a helping hand, we have partnered with Coralive.org and Blancpain Ocean Commitment, and established a novel coral restoration project on our eastern reef. Explore the site with our conservation team and learn more about the methods used to protect our reef.

We have our own PADI dive center and our dive masters know just where to drop you to explore giant granite boulders, where you can encounter an array of different fish species, turtles, rays, and for the daring, sharks.

Snorkelling equipment is available for all guests and inclusive of the room rate. Get your gear and start exploring the underwater world from the shores or charter one of our yachts for a trip to nearby Little Fregate, where it is like being dropped into an aquarium.

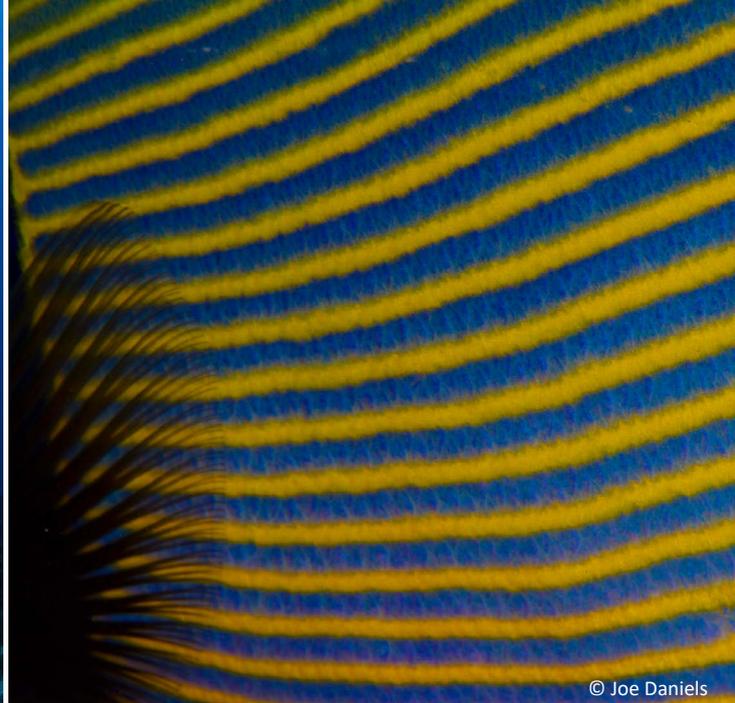

Or you go for a guided scuba dive with one of our dive instructors or dive masters, who know all the privately protected reefs.

We also offer PADI certified diving courses for all levels - starting from the little ones in the pool end ending with the masters in the great ocean.

DIVE SITES OF FREGATE ISLAND PRIVATE

Short Range Dive

Anse Victorin Buoy

This dive site is located directly in front of our Anse Victorin beach and is available all year long. It is in between 7 and 12m deep and suitable for all diver levels. The hard coral reef composition of the bottom makes this site really spectacular.

Airport Reef

Situated only a few minutes from our Airstrip, the Airport reef is diveable the whole year. The hard coral plateau is 6 to 18m underneath the water surface and accessible for all level of divers.

Barracuda Rock

Available from November to July, the beautiful dive site "Barracuda Rock" should be discovered by more experienced divers with an Open Water license. It is 5 to 20m deep and the bottom is composed of a beautiful submarine granite rocks and hard corals.

Anse Felix

This very interesting dive site is located in the southern part, directly in front of our Anse Felix Beach. It's all year availability gives every level of diver the possibility to explore the stunning corals, which are 10-15m deep in the Indian Ocean.

Grand Anse Reef

With its 5 to 16m deep hard coral reef, the Grand Anse Reef is diveable the whole year long. All divers are invited to see the beauty in front of our most natural beach.

Lion's Rock

This Short-Range spot is diveable all year around. With its Submarine Granit Rock bottom, which is 10-40m deep, Lion's Rock is more recommended for experienced divers with and Advance Open Water license when it comes to deeper water levels.
